Mutual Respect

If I try to do what I can to protect our amazing planet, it will create a better world for everyone to live in.

Is it the responsibility of the young to protect the planet?

Sir David Attenborough has celebrated the efforts of young people who have “woken up the world to the threat of climate change.” Sir David became the fastest person to have one million followers on Instagram after he joined the social media platform to reach out to younger people, many of whom support his message of protecting the natural world. Sir David said he would use the platform to share videos explaining what the problems are and how we can deal with them. 94-year-old Sir David invited viewers to "join me - or as we used to say in those early days of radio, stay tuned." He has also recently released a book and film, both of which look back at how different the natural world is now compared to when his early programmes were filmed.

Have we seen any of his documentaries? Talk about why you think he is so popular, in particular with young people. Why do we think he has chosen to join Instagram and why do we think he has joined now? Are you surprised that he became the fastest person to date, to receive over a million followers? Do you think that through the use of social media, Sir David will spread his message more effectively?
