NEW SCHOOL BUILD

For those who live locally to the school, you will soon be receiving a leaflet through your door inviting you to a consultation evening regarding the new build. Once a date is confirmed (we are hoping before half term), the KS2 hall will be open from 3pm - 7pm and it will be an opportunity for all of the school and local community to see the plans for the new school and speak to those involved. We will share further information though our school website and school newsletter in the coming weeks.

AUTHOR VISIT

Key Stage 2 spent a fun filled afternoon with author James Davis!

Sharing his new book Scarlet saves the Multiverse! We had lots of laughs, magic tricks and even created our own characters!

Thank you again Simply Books for providing us with such amazing opportunities.

AND FINALLY ...Parking

Just a brief reminder about the email you received on Thursday regarding parking around the school and in particular on the single yellow lines. We really don't want to see anymore near misses or accidents.

This is even more challenging without a crossing patrol at this present time.

Please park away from the school, and allow pedestrians the space to walk on the pavements. Bear in mind some families have pushchairs and some people may be in a wheelchair.

I hope you all have a great weekend.

Best wishes,

Paul Anderson
Headteacher

In the news this week

The Football Association (FA) has published a review looking at behaviour in football across England. It wants to ensure football practice and matches are safe, fair, and enjoyable for everyone, including players, referees, and fans. The review encourages all involved in the sport to play their part in supporting and following values of positive behaviour.

Things to talk about at home ...

- Share your experiences of sporting or other competitive events with someone at home. Have you ever felt strong feelings when watching or taking part?
- Do you believe players and fans should have the same rules about respect?
- Discuss what you think might happen if winning becomes more important than respect.

Does how we behave matter as much as how well we play?

Please note any interesting thoughts or comments

At The National College, our WakeUpWednesday guides empower and equip parents, carers and educators with the confidence and practical skills to be able to have informed and age-appropriate conversations with children about online safety, mental health and wellbeing, and climate change. Formerly delivered by National Online Safety, these guides now address wider topics and themes. For further guides, hints and tips, please visit nationalcollege.com.

What Parents & Educators Need to Know about

ROBLOX

WHAT ARE THE RISKS?

Roblox is an online platform where users can play and create games known as 'experiences' made by other users. Roblox has a large UK audience. ITV News has reported that millions of people in Britain use the platform regularly, with children forming a significant proportion of its users. The sheer scale of it makes it extremely difficult to moderate effectively, creating risks for unsupervised children.

A PLATFORM RATHER THAN A GAME

Roblox differs from traditional video games in that it hosts millions of user-created experiences rather than a fixed set of developer-produced content. Each experience is self-rated by its creator rather than independently age-rated in advance, as is the case with PEGI-rated games. With millions of user-created experiences, moderation is largely automated which means that inappropriate content may reach younger players and have a harmful effect.

MATURE CONTENT

With much of Roblox's moderation automated through AI and creators self-certifying suitability, inappropriate content frequently appears on the platform. Some experiences may include content intended for older players. While Roblox has tools to restrict access based on age settings, these systems are not always perfect. Younger players are likely to encounter content you may deem unsuitable.

IN-GAME SPENDING

Roblox is free to play, but many experiences and cosmetics include optional purchases using Robux, the platform's virtual currency, to get advantages in games. This business model is common across online games, but reporting has highlighted cases where children have spent large amounts of money unintentionally or without understanding the real-world cost.

RISK OF ADDICTION

Roblox encourages repeated and extended play. Many experiences are made of short tasks, rewards, and progression systems that can prompt users to keep playing for longer periods of time. Some games also use reminders, daily rewards, or timed events to encourage frequent logins. These designs can make it difficult to stop playing. Spending long periods online may affect sleep, schoolwork, or other activities if boundaries are not in place.

COMMUNICATION WITH OTHER USERS

Roblox includes text and voice features that allow players to chat in shared game spaces. While the platform uses automated filters and moderation tools, media investigations have found that inappropriate and potentially harmful messages can still get through. There are risks that children could be targeted by groomers. In response, Roblox has announced changes to how chat works. The platform plans to use facial age-estimation technology to restrict chat access between adults and children they do not know.

Advice for Parents & Educators

USE PARENTAL CONTROLS

Roblox's parental controls provide an important starting point. Linking a child's account to an adult account allows parents to apply spending controls, limit communication features, and review recent activity. Regular supervision, use of parental controls, and conversations with children about what they see online can help reduce the risk of exposure to inappropriate content.

CONSIDER LIMITING OR DISABLING CHAT

Although Roblox is introducing tighter age-based chat restrictions, some parents and educators may prefer to disable chat entirely for younger children. Children can still play games while communicating with friends they know through other supervised platforms.

PLAY TOGETHER WHERE POSSIBLE

Playing Roblox with a child can help adults understand the types of experiences available, how monetisation works, and how children interact online. This shared engagement can also make it easier for children to raise concerns if something feels wrong. Parents and educators should monitor all games played on Roblox due to its self-rating nature.

ENCOURAGE OPEN CONVERSATIONS

Many Roblox experiences are creative and age appropriate, and for many children, the platform is an important way to socialise with friends. Rather than banning it outright, parents and educators should talk openly with children about online safety, spending, and how to respond to inappropriate behaviour.
