

Science

In Science we are learning about habitats. Make a habitat in a cardboard box! You could Google 'shoebox habitat' for ideas!

Maths

This term we are looking at place value. Can you partition 2 digit numbers into their tens and ones? We are counting forwards and backwards in ones and tens from zero to one hundred.

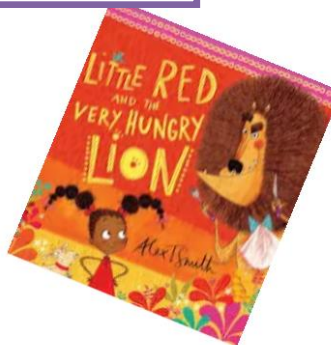

English

Create a story about your own very hungry lion. Perhaps in your story he is very fussy about food and doesn't like normal lion food.

PSHE

Our values this term are Patience, Perseverance and Curiosity. Our overall theme is 'Keep Learning'. Each week we will be trying to learn a new skill. What new skill can you learn at home? Maybe you are learning to ride a bike or try a new sport. Take a photo and send it to us on dojo.

Year Two - Term 1
2026

Computing

Your Purple Mash log in details are stapled in the front of your reading record. Why not log in and play some of the educational games there.

Geography

We are learning about Kenya. You could make a Kenyan flag or find out about other African flags.

PE

Make your own obstacle course using garden equipment. Time yourself and try to beat your own personal best. Remember to take a picture or video to share with the class.

Art

Draw a picture of an African animal. If you want an extra challenge, you could try making a junk model of your favourite animal.
