

Morton Primary School Science Intent

Child Friendly Tagline: Discovering how Science makes the world go round.

At MPS, our Science curriculum is knowledge rich and embedded with **scientific vocabulary** to ensure that the substantive knowledge and key skills - disciplinary knowledge - are taught in **meaningful contexts**. This is achieved through **first-hand experiences** and **purposeful practical work** that develop the children's skills and knowledge. The scientific strands are interwoven within our STEM approach so that our children's scientific knowledge is built upon each year. This enables the children to build their curiosity and understand the **impact of science on the wider world**. Children will learn this through a scientific framework, developing knowledge and experiences that foster their natural curiosity, which will allow them to comprehend their **scientific legacy** and how this **impacts their future**.

At Morton Primary School...

Purposeful to give meaning and value to our learning which prepares us for our next steps.

Experiences that widen our opportunities, challenge us and allow us to see the wider world.

Targeted vocabulary and high quality texts means we become language rich.

Strive to create aspirations for ourselves, our family and our community, whilst reflecting on the difference we are making in society.

...we STEP into our curriculum!
