

Mrs Greenhalgh's Weekly Challenge

30th March 2020

If winging it is still working, stick to it, if not, set up a structure. We sent one out last week, I'll publish another one on Facebook for you to use if it helps. Any problems, send me a Class Dojo message. I would also love to see any photos or videos.

1. Check last weeks.... achieve a couple more. To stick with the programme, prioritise a tidy workspace for the children.
2. Do daily exercise (Your own, Joe Wickes, 9.00am on Youtube, Cosmic Kids (great for the younger children) etc. this is on line, available any time).
3. Each Day - **Read**, or get your child to read (either a book, Bug Club, or kindle, or audible) But one of the things that could be lost, isn't academic stuff - we'll sort that, it's resilience to challenge, perseverance to challenge and work stamina. Infant children should be able to stick on a single task for 6 minutes, plus their age. So, a 4 year old should be able to sustain a task for around 10 minutes. Junior kids should be able to sustain an activity for 11 minutes plus their age. So a year 6 kid $11 + 11 = 22$ minutes. Of course, this lengthens with adult interactivity.
4. Daily Maths for the above length of time... TT Rock Stars for the Juniors, Numbots for the Infants. We also have My Maths for both. White Rose Hub have loads of stuff on line, and we've sent you the details for this <https://whiterosemaths.com/homelearning/>
5. Create a greeting card for a friend or neighbour, to say hello and that you are thinking of them. Post it through their letter box when you go for a walk.
