

Maths: This half term, the topics we will be covering are fractions, decimals and percentages and algebra. We will learn about comparing and ordering fractions, decimals and percentages and then learn about finding fractions and percentages of amounts. We will then move on to algebra where we will understand formulae and form equations.

English: We will begin studying our key text Macbeth, understanding the text and taking part in drama activities. We will then use this text as a vehicle to write letters, a balanced argument, a newspaper article and a retelling of the story before moving on to writing a biography of William Shakespeare.

Science: This half term, we will be looking at the circulatory system. During this unit, the children will look at the circulatory system as a whole before taking a closer look at the roles of blood and the heart within the system. We will then look at oxygenated and de-oxygenated blood before finishing the unit with a heart dissection!

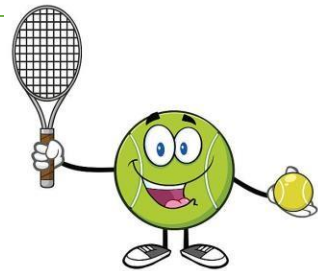

Year 6 - Spring 2/Half-term 4

Computing: This half term, we will be beginning a unit on networks. During this unit children will learn all about the internet, the history and potential future of the internet and will learn about LAN and WAN.

RE: This half term, the children will be taking part in a Christianity unit with a focus on Jesus. The big question they will be answering at the end of this unit will be 'Why do Christians believe Good Friday is 'good'?'

PE: This half term, we will continue our net and wall unit of PE. The children will be exploring a variety of net and wall games and looking closely at the skills required to play these.

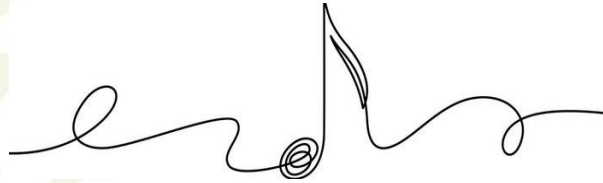

Geography: This half term sees the start of our work on global changes. We will consider 'Our World Our Future' and learn about the political and natural changes our world has undergone. We will learn about urbanisation and deforestation and think about what our world will look like in the future.

Art: This half term sees the continuation in the study of the wonderful work of Banksy! We will be using a mixture of painting and stencils to create our very own Banksy inspired art work.

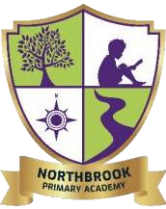

Music: This half term, children will continue to learn about notes of the stave in the treble clef and rhythms with minims, crochets, quavers and semi quavers. We will read music to play the recorder and compose and write out own music with the notes we have learnt.

Year 6 - Spring 2/Half-term 4

Spanish: The children will be learning about music and opinions. They will be identifying music genres in Spanish and giving their opinions on these as well as extending their vocabulary to discuss things they like/don't like.

PSHE: Our first unit of work this half term will be focused on thinking about our feelings and emotions and dealing with 'worry'. We will then look at British Values and the need for respect and tolerance in our community.

Design Technology : This half term we will begin our unit on electronics. We will use our knowledge of circuits to design and develop our own working alarm system.
