28th March 2022 - Part 2

Y1 enjoyed a fabulous visit to the Fire Station in Norton as part of their 'Great Fire of London' topic. The children met firefighters who shared what it's like to be a firefighter. The children were amazed to hear how varied the job can be - **it's not all about fires!**

The firefighters demonstrated how to use cutting equipment, they talked about their special protective uniforms and all the types of equipment stored on a fire engine. One of the highlights was when the children were invited to practise using the powerful hoses.

School Hydrogen Challenge Y5 & 6 pupils took part in School Hydrogen Workshops. These workshops put the technology of the future into the hands of our pupils– challenging them to design the most energy efficient hydrogen powered vehicle. The workshop was designed to inspire the next generation of renewable energy engineers to get involved in developing cleaner and greener transport. The children were enthralled as they designed, built and tested hydrogen powered model cars while learning about the environment.

Year 4 had a fantastic afternoon working alongside Sophie, Jamie and Rebecca from **Bright Minds Big Futures**. They took part in a workshop looking at important topics such as: volunteering, campaigning and fundraising.

The children shared their amazing ideas on how they could help make a positive change in school, their local community and the world.

BMBF have taken away lots of ideas from the Year 4's and are looking forward to supporting us in achieving our objectives. Watch this space for the exciting events coming up...

Before they left, Jamie and Rebecca

donated a bottle farm so Year 4 can grow

The Y4s were immersed in hands-on learning with an educational school visit to RSPB Salt-holme nature reserves. It was a great opportunity to inspire them to talk about their science and geography learning while fully engaging in the great outdoors.

The rangers were extremely impressed with *the children's exemplary* behaviour and their knowledge of classification keys.

World Maths Day World Maths Day is a national event that took place in schools across the globe on Wednesday 23rd March 2022 to celebrate maths. The children enjoyed a memorable maths day. I observed Y1s magical morning of measurement.

The children learned about capacity, weight and length and completed a carousel of activities.

It was great to use the tape measures, balance scales and measuring containers to find the answers to the problems. Y3s cracked the code to open Captain Cook's treasure chest.

answers to the problems. Y3s cracked the code to open Captain Cook's treasure chest.
