# Line Drawing

A line drawing consists of only lines and no shading.
A good line drawing has 'quality of line' which
means it has thick and thin lines. Quality of line
often described the shadow or weight of the object
being drawn. Lines can be short too, such as dots
and dashes.

Create a line drawing of the shell below. Try
to capture as much detail as you can. Use the edge of the box to help you get things in place.
