

Coloured Pencil

Look at this amazing coloured pencil drawing. See what brown, terracotta, ochre and yellow pencils you have. In the space below practice **gradating** coloured pencil. That means making it go from dark to light. Also practice **blending** different colours together.

Next, draw the shell that you can see above in the empty box. Lightly sketch in pencil first so that you can erase your lines if you need to. Once you are happy with the shape, start to softly apply pencil. Make sure your lines follow the shape of the shell. Gradate and blend the pencil colours to achieve a successful coloured pencil drawing.
