

# Careers in Art and Design

Do you love ART and DESIGN?

Do you look forward to your art lessons in school?

Do you draw and make things at home?

Do you ask to go on art courses (such as learning how to 'throw a pot') during the holidays?

At festivals and fairs do you gravitate towards the arts and crafts tents?

IF SO

Have you thought about where studying Art or Design can take you in the future? Have you considered using the creative subjects you study in school as a starting point for a career in the arts?

Some art paths like architecture or fashion design start at University but there are many other careers out there with different career paths for those who are able to envision, design and create beautiful things.

Studying art lends itself to a wide range of exciting and creative professions such as potter, makeup artist, costume maker or woodcarver. Whether you are interested in working on a computer or taking photos or whether you appreciate traditional craftsmanship and construction, Art and Design can help you develop a range of practical and creative skills that will be of advantage in your future.

Have a look at the attached PowerPoint for ideas and tips on how to use Art and Design in your future.
