- Mitre Saw
- Binca
- Dye baths
- PVA glue
- Scissors
- Grater
- Embroidery thread
- string
- Rulers
- Craft knives
- Peelers
- Sewing thread
- Wet and dry
- Neoprene
- Tape
- Vice
- cooker
- Bond a Web
- Paper
- Fabric
- Pillar drill
- Line bender
- Velcro
- Card
- Wool
- acrylic
- Hard Board
- unpicker

Which statements are important to consider when designing

- Quantity is more important than quality.
- Quality is more important than quantity.
- Press hard with the pencil so everything stands out.
- Press softly with a pencil so you can rub out mistakes easily.
- Design work should be coloured using felt pens.
- Design work should be coloured using colouring pencils.
- Colour quickly to fill in everything.
- Colour slowly so there are no white gaps.
- Labelling needs to explain your ideas.
- Design work doesn't need labelling as the text detracts from the design work.
- Make sure design elements are small so colouring is easier.
- Make sure design elements fill the space so you don't have too much background.

Highlight which statements are correct when evaluating your work

- Explaining , in detail, how you made your product.
- Explaining aspects of your product that could have been done better.
- Finding out your class-mates opinion of your work.
- Completing a star chart.
- Describing the aspects of your product that have gone well.
- Evaluation is ongoing throughout the project.
- Describing what inspired you to make your product.
- A drawing or photo of your finished work.
- Explaining what you would do differently if you made your product again.
- Giving ideas and suggestions of ways that might improve the project.
