

Answer Sheet

Remember, (M) is written next to those questions you should have tried to solve mentally first. (W) means a written method is usually more efficient for this question.

1. $\frac{2}{3}$ of 99 = **66** (M)
2. $700 + \mathbf{600} = 1,300$ (M)
3. $7,543 - 5,636 = \mathbf{1,907}$ (W)
4. $765 \times 10 = \mathbf{7,650}$ (M)
5. $873 \times 8 = \mathbf{6,984}$ (W)
