

Answer Sheet

Remember, (M) is written next to those questions you should have tried to solve mentally first. (W) means a written method is usually more efficient for this question.

1. $562 \div 8 = 70\frac{1}{4}$ or $70\frac{2}{8}$ or **70.25** (W)

2. $569 \times 8 = \mathbf{4,552}$ (W)

3. $654 \div 100 = \mathbf{6.54}$ (M)

4. $87 - 29 = \mathbf{58}$ (M)

5. $98 + 165 = \mathbf{263}$ (M)
