

Elf Class Update

This week in IPC, Elf class has been very busy as scientists. We have made sandwiches with cream cheese and used our very own, homegrown cress to add to this. The children were incredibly safe and sensible. As a group we put together a set of instructions for the children to follow. They followed the instructions flawlessly and the results were amazing. We definitely have some budding chefs amongst us. The sandwiches were prepared and put into the fridge for our Exit Point the next day.

During this term, the children have been learning about trees, plants, freshly grown produce and flowers. So, for the Exit Point we put together an Oxford Gardens Flower Show. The children were able to look at some of the beautiful flowers that are seasonal at the moment, describe the structure of flowers in detail and share their knowledge of trees, plants and flowers. To finish off the afternoon, they ate their sandwiches and biscuits and drank juice, just like they would do at any good flower show or garden center. Well done Elf class.
