

What an incredible year we have had!!!! The children in Gremlin class have been total superstars!!!!

In IPC we have been historians, showing our knowledge of the significant leaders and explorers, who have made an impact on our lives today. We have been scientists, where we planted, grew and ate our very own produce. The children recognise the importance of producing your own vegetables and just how tasty they can be. During Science Week, we made robots that almost moved by themselves!! I am sure that in the future Gremlin class will remember this and adjust their ideas to be sure the robot will move.

The children have been wonderful mathematicians. They have learned so much and are ready to move to the next level of their learning in Year Two. When they are given a problem, they now approach it with confidence and use the methods they have learned this year, we are so proud of them. |

In literacy we have read so many wonderful books and from these books the children have taken their inspiration to become creative and independent writers. It is wonderful to see where they began the year and the writing skills they are using now; you are all incredible.

And finally, we finished our music lessons with a concert at the Royal College of Music. We have been following a programme with a group called Sparks. The children have been introduced to classical music and composers, Franz Schubert, learned a tricky song and played procession instruments. They were outstanding! It has been a pleasure teaching Gremlin Class this year and we would like to say, well done to all of you!!!! From the Year One Team.
