

We finished last term with a wonderful Exit Point. So many parents and carers came to our immersive museum, where the children show cased all they had learned about historical leaders and explorers. The children were outstanding and everyone had a wonderful time.

This week we have been learning about standard measurements. The children have begun to use meters and centimeters to measure distance and length and litres and milliliters to measure capacity and volume. Here you can see them in their table groups throwing bean bags and carrying water and then measuring their results. Lots of learning took place and we had fun too. Well done Gremlin class.

Thank you to all who joined us for the Grenfell Memorial Day. Gremlin class spent the day taking part in various activities; we attended our whole school assembly, read stories and made lots of beautiful crafts. We read *Speak Up*, a book where a little girl used her voice to speak out in a positive way. The children were amazing and made a difficult day calm, kind and memorable.
