

Unicorn Class

17.01.2020

Welcome to Unicorn Class.

What a great start to the new year, everyone has settled quickly and are working well!

In Maths, we have been looking at the days of the week and the months of the year, as well as the seasons. The children are getting better and better. Why not ask them to tell you the months of the year? Currently we are looking at 10 frames to aid our understanding of calculating numbers.

In Literacy we have been thinking about how stories are made. We have been creating our own stories using a beginning, middle and end. We have been writing sentences using our phonic knowledge to work out each word.

In Understanding of the World, we have a new topic on Explorers. The home learning from over the holidays was amazing! They are now on display in the classroom. We have been exploring the world of African savannah animals and animals found in the frozen world. It has been brilliant listening to all the learning the children have been doing around this topic.

Thank you for your continuing support.
