

Giant Class Web Update

We have done lots of amazing work this half-term and we have particularly enjoyed learning all about Dinosaurs!

Our favourite activity was when we went outside to measure and draw dinosaur footprints. We used cubes, cm and metres to measure the length of a Triceratops and Allosaurus footprint and we then investigated how many times bigger their feet were compared to ours using our shoes. We also used fact cards to measure and draw accurate to-scale representations of a Velociraptor and T-Rex footprint!
