

Giant Class have had a super start to the year and have all settled in brilliantly!

In Literacy, we have been reading "Tyrannosaurus Drip" by Julia Donaldson and writing exciting character and setting descriptions.

In Maths, we have been practicing our number bonds to ten and learning about place value in 2-digit and 3-digit numbers.

We also enjoyed a really exciting IPC entry point for our new topic "Footprints from the Past". We became palaeontologists for the day and found a dinosaur egg in our playground!

Here are some photos of our wonderful work over the last few weeks:

spoken words

The slow chunky and feafy dinosaur stomps loudly through the dirty, muddy and weedy swamp. They go through all the leafy, healthy leaves and munch and crunch all day and for a drink they go to a pond. Crummy bits of mud and leaves float as light as a feather through the sun green dark leaved trees blowing in the wind and some dinosaurs eat the leaves off them. On sunny days the sun shines out and mud oases out into the swamp. There were lots of dinosaurs and trees and they were eating meat and leaves having a terrifying day.
