

Giant Class Web Update!

We have had a brilliant start to the Spring Term and it all began with our Entry Point for our new IPC topic “Active Planet!”

As soon as we arrived at school we noticed that overnight, our classroom had been destroyed by an earthquake! Together we explored what causes earthquakes, took part in an earthquake drill and made posters explaining how to stay safe when this disaster strikes. We then learned about earthquakes at sea –tsunamis – and created our own small-scale model of them.

Following this, we shared our amazing volcano IPC projects before making our own mini volcanic eruptions! We reflected on the human rights that are affected by natural disasters like these, learned about the importance of disaster relief centres and wrote our own TV broadcasts for a devastating natural disaster of our choice.

Here are some pictures of our amazing work!
