

Centaur Web Update

In Literacy, we have been continuing our story "Percy Jackson and the Lightning Thief". We have been writing informative sentences about Medusa and also exploring different myths. Over the last couple of weeks, we have been looking at writing our own non-chronological reports based on the story.

In Maths, we started the term off looking at reflecting and translating shapes. We then moved onto decimal work, which allowed us the chance to develop our rounding skills as we practiced rounding to the nearest whole number. Over the last couple of weeks, we have been developing our skills and knowledge to solve and answer multi-step word problems. We have been using addition, subtraction, multiplication and division to solve these. This week has seen us recap our learning on percentages, which we've used to solve percentages of an amount.

In IPC, we have been artists and historians exploring Ancient Greek history. We have created persuasive adverts for Sparta and Athens as well as studying the Persian War. We have also designed our very own pottery inspired by the Greek Gods Poseidon and Athena along with having the chance to dress up and pose as a Greek God.

This half term has also seen us take part in some exciting events. We started off by celebrating World Book Day, which was so much fun. We took a trip to Daunt Book, dressed up as our favourite book characters and even had an assembly with the author Ewa Jozefkowicz.

Miss Harroo even planned a great trip to the London Planetarium for us, where we had an immersive experience as to what life is like on Mars and explored the Maritime Museum. We've also experienced the wonderful talent that OGPS had to offer in our Red Nose Day talent show. As well as this, last week we took part in Robot Week. This allowed us to work in teams and create a working Robot, which was then presented to the parents and judges. Can you believe our Robot came 2nd out of the whole school?

What an exciting and busy half term we've had!
We cannot wait for some more wonderful learning to take place in the summer term.
