

Hippogriff Robots

Last week, we took part in robot week and were challenged to research, design and build our very own robots. We had complete creative control but the robot had to move and communicate somehow. As a class we chose to make our very own NDR Robot-Natural Disaster Robot, who primary function was to help with the rescue effort and find survivors; bringing them food, medical care and alerting the search teams as to the position. We included a light bulb and micro-bit to flash warnings and also an m-bot for movement. Have a look at what we got up to:
