# A Minibeast Hunt

Name \_\_\_\_\_

Complete the table during our Minibeast Hunt. Where are they hiding?

	Minibeast						
In the grass 							
Under a log 							
Under a stone 							
In the air 							
In a tree 							

Where did you find the most minibeasts? \_\_\_\_\_

Where did you find the least minibeasts? \_\_\_\_\_

Why do you think this was? \_\_\_\_\_

# Awe and Wonder

## Paper Towel Colour Mixing

### You will need:

Water

Kitchen roll

Plastic glasses

Food colouring  
in primary  
colours

### Method:

1. Put red food colouring into one glass and blue food colouring into another glass. Add water to both glasses.
2. Using 1-2 sheets of kitchen roll, roll length ways into a tube.
3. Bend in half and dip one end into each glass.
4. Watch what happens as the colours travel.
5. What can you see happening? What happens to the colours?
6. What colour can you see where the blue and red meet?

### The Science

Water moves up the paper towel because the paper is absorbent, it sucks up water. The colour travels with the water making the paper change from white to red or blue. Colours mix when they are joined together, red and blue make purple. See what colours can be made with just the primary colours.
