

Cultural Capital Opportunities in Maths

Students take part in Pi day activities annually where they learn about the history and applications of Pi.

Additionally selected students complete mathematical enrichment opportunities such as the UKMT challenge, Lancaster University School of Maths (LUSoM) challenge and the Runshaw College challenge. In 2023 our students won the LUSoM challenge and were runners up in the Runshaw College challenge; in 2024 Priory students won the prestigious Runshaw College challenge, beating twenty other teams.
