

Homework in Science

Homework is set weekly on Seneca (www.senecalearning.com) and takes the form of revision tasks. These assignments will typically provide pupils with a summary of relevant information followed by a series of short answer questions. This allows pupils to build good habits of revisiting and recalling prior knowledge throughout their time with us.

For any issues relating to accounts/login details, pupils should message their teacher on Teams in the first instance.

Year 11 will also receive a homework booklet of past paper questions in each half term. This is vital in ensuring they are prepared for the terminal exams at the end of year 11, as well as providing further opportunities to revisit and apply prior learning.
