

Governors at Priory

I have been associated with Priory for over 10 years, and I am now proud to be the Chair of Governors and a Trustee of the Academy. Two of my children enjoyed a successful secondary education at Priory which provided a great foundation for their subsequent study and careers.

My background is in engineering and I have enjoyed careers with the Royal Air Force, BAE SYSTEMS, and latterly as a policy lead within the Department for Education. I have a particular interest in the Science, Design & Technology and Mathematics departments within the Academy. Speaking to pupils, I know that each of these are exciting and vibrant departments offering really good experiences for our young people.

'Being a Governor at Priory is tremendously rewarding – you genuinely feel that you are actively contributing to improving the life chances and choices of the next generation, and I would recommended the role to anyone who would like to help develop young people and the local community'.
