

Moonbeam Class

Summer term – Work web

Using any materials you can find, make a boat that doesn't sink in water. Write out the instructions on how you made it.

Roll a dice three times and add the numbers together. Repeat this at least ten times. If you don't have a dice, you can make one!

Create your own word search! Include at least 10 words in your word search. Ask a family member to complete it and mark it for them, swap with a friend or you can send it to me at School or email it to me and I will complete it!

Challenge: If you can, include words that have split digraphs in them.

Examples: snake, flute, mine, theme, bone, cake, phone.

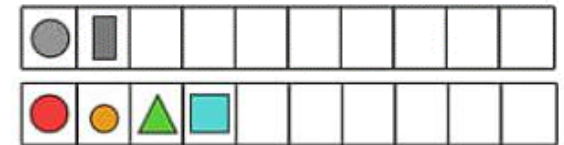

Week 2

Draw or create your own alien and write a short story about an adventure they will go on. They could have their own planet, have 8 heads, have magical powers, save an animal species in space, anything you like!

Remember to use all key elements of writing including finger spaces, capital letters, punctuation, adjectives, time connectives and conjunctions.

Design a new and exciting ice cream. It could vary in colour, flavours, be sour, turn your hair blue or make you run quickly. Be adventurous! Write me a short description telling me all about your ice cream. You can also include labels on your design.

Create your own repeating patterns with 2D shapes. To make it more challenging, you can include different colours. How many 2D shapes can you remember?

Choose one of the activities from the web to complete each day, (Monday to Friday) and send any photos or videos of your completed tasks to my email. I will also be happy to answer any questions you may have, regarding these tasks. I can't wait to see how you get on! swilson@poolhouse.lancs.sch.uk
