

Colourful semantics

Colourful semantics is a system for colour coding sentences according to the role of different words.

It can help children to understand word meaning and to build meaningful, well structured sentences.

How to do it?

Describe actions in the moment or look at pictures/books - talk about:

- ♦ **Who** is eating?

- ♦ **What is** the boy/girl **doing?**

Help your child to select the correct symbol and place on the sentence template then say the sentence for them to copy e.g:

"The cat is eating"

Please contact your child's Speech and Language therapist for more advice.
