

First and Then

A "first, then" picture card can help your child to understand what is happening next.

Your child may be motivated to do something they are not so keen on if they see that a more rewarding activity follows.

This can be used in conjunction with photos or symbols familiar to your child.

If there is something your child is not keen on use a picture of this on the "first" side of the card. Pick something they like to put on the "then" side and use the language "first--- then---" e.g. "First medicine then DVD" or "first sandwich,, then yoghurt."
