Dear Parents and Carers

Education Record App

The Department for Education (DfE) is launching the Education Record app this summer. Year 11 pupils in England will be able to securely access and share GCSE results, school history, and support needs directly on their phones. This app aims to modernise enrolment for further education and reduce reliance on paper certificates. For more information use the following link [Parents, guardians and pupils - view education records](#).

Each pupil's record will include individual candidate information, such as:

- Their name, address and date of birth
- The schools they have attended
- Their qualifications (once results are released)
- Any support needs.

Education records are issued through the DfE Education Record App. Pupils will need to download the app onto their mobile phone from the Apple App Store or Google Play Store.

The remaining enrolment steps will take place in school, where pupils will scan a QR code.

Once the enrolment process is complete, pupils will be able to access their education information securely on their phone. The app allows them to share their education record digitally with sixth forms, colleges or other providers as part of the enrolment process.

It is important to note that the Education Record app is not a replacement for GCSE results day. Pupils will still receive their results in school on results day in the usual way.

Although this is not mandatory, it is highly recommended by us and the department of education as this information is then readily available whenever pupils need it in the future for both higher education and employment.
