

Friday 24th April

I hope you have all enjoyed the first week back to term as much as is possible given the circumstances we all find ourselves in. Thank you to everyone who has taken the time to answer our survey to give feedback about home learning. If you have not yet managed to, we'd really welcome your feedback via this link:

<https://www.surveymonkey.co.uk/r/MFXPCX3>

We decided to begin term with a whole school Science week as a way of supporting you to gently ease yourselves back into routine. For some, this worked very well and for others you fed back that this was a challenge and you preferred individual year group planning. All families have very different circumstances and we continue to endeavour to plan and adapt for all.

Next week, teachers will be introducing new topics to the children based on preferences expressed at school for future topics and through feedback on Seesaw. Clearly, the start to a new topic will be very different at home to how we may introduce it at school, so if the children have any questions or ideas for achievable home learning activities, please do support them in contacting their teachers about this. All home learning activities and resources can be found on our website [here](#).

It was noted as part of the survey feedback that we use a variety of platforms for different purposes and it may sometimes be unclear as to where to look for resources or support. To this end, I have created a quick guide [here](#) which will hopefully provide some clarity as to how we now use online platforms to support learning in different ways. If only there was just one that did everything! Again, if you have any questions about any of these, please email your child's class teacher in the first instance.

Thank you for your continued support.
