

Our Return and Recovery Curriculum

Our return and recovery curriculum will begin with home school learning transition packs, see section of the website transition plans.

In September we will be teaching a full curriculum. This is to ensure all our pupils receive a stimulating, broad and balanced experience during their time in school.

However, timetabling will ensure there will be increased curriculum time focusing on the key priorities listed below. We believe these priorities are important, to ensure all our pupils return to school positively, safely and ready to continue their exciting learning journeys.

The key priorities are to:

1. Establish, after a long time away from school, new routines
2. Develop positive and caring relationships between staff and pupils and pupils and their friends.
3. Ensure all our pupils, at their level, develop an understanding or acceptance of how to stay safe during this continued pandemic e.g. importance of accepting and understanding hand washing.
4. Ensure all our pupils have increased opportunities for physical activity and learning outside, important ways to remain healthy.
5. To help pupils' explore and understand their and others, emotions and feelings including potential worries as they return to school.
6. Celebrate the new skills and knowledge our pupils may have gained over their time at home.
7. Revisit previous targets to ensure all our pupils have a firm foundation ensuring they can move forward in their learning journey.
