Mr Osborne's News

Welcome to Issue 649 of the Revoe Reporter! It's been another busy week at RLA!

This week, ten of our Year 6 children took part in a special workshop called Show Racism the Red Card, run by Blackpool Football Club Community Trust. This brilliant programme uses football to help children learn about racism and how we can all play a part in stopping it. The children had a fantastic time and came back full of enthusiasm, keen to share what they'd learned. It was a great reminder that we are one Revoe family and that racism of any kind has no place in our school.

Today, we also celebrated World Mental Health Day. The children were invited to wear yellow to help raise awareness of the importance of looking after our mental health and the school was a sea of yellow! We are raising money for Young Minds, a charity that supports children and young people's mental wellbeing. Throughout the day, the children took part in activities and discussions about how to stay mentally healthy and support one another.

Both of these events link brilliantly with our school value of the week: Kindness. Whether it's standing up for what's right or looking after ourselves and others, kindness is at the heart of everything we do.

Looking ahead to next week, we're really looking forward to welcoming you to our first Parents' Evening of the year on Tuesday 14th and Wednesday 15th October. It's a great chance to see your child's work and chat with their teacher about how they're getting on.

We know that working together with families makes a big difference to children's success. There'll also be refreshments available in the dining room, along with a number of local services who can offer support and advice on a range of topics. Thank you, as always, for your continued support. Have a lovely weekend

Value of the Week

Kindness!

Last week's value: Cooperation

In assembly this week, we talked about what it means to be kind and how we can show kindness to everyone: in school, at home and in the wider community. Please talk to your children about our values and where possible reinforce them at home.

Dates for the Diary

14/10/25 and 15/10/25- Parent's and Carer's Evening

15/10/25 - Tempest Photo Order Deadline for Free Delivery to School

20/10/25- Recycling and Careers Week

20/10/25- Diwali

23/10/25- Break up, after school, for half term

Learning at RLA!

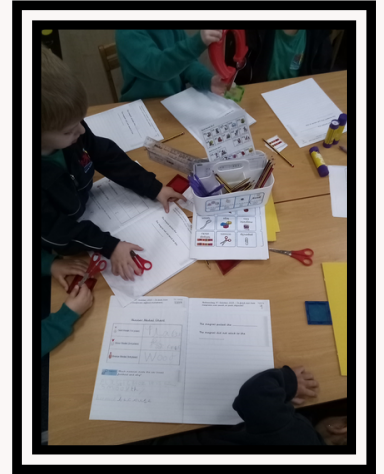

Reception

This week, the children have been exploring the concepts of capacity and number in Maths. They particularly enjoyed investigating which containers could hold the most liquid through hands-on experiments. In Topic, the focus has been on the seasonal changes that occur during Autumn, with the children observing and discussing how the environment transforms. Inspired by this, they created beautiful Autumn trees in Art, using a range of warm, autumnal colours to reflect the season.

Year 1

This week in Science, our curious Year One learners have been exploring forces! We introduced them to magnets and they had great fun investigating how they work. Using the key words "attract" and "repel", the children observed how some materials are pulled toward a magnet, while others are pushed away.

Ask your child what objects in your home they think a magnet might attract!

Year 2

🎨 Year 2 Art – Nature Meets Creativity! 🍁🌿

This week, Year 2 took their creativity outdoors, using natural resources to create beautiful art pieces inspired by Andy Goldsworthy! 🌱🍵🌸

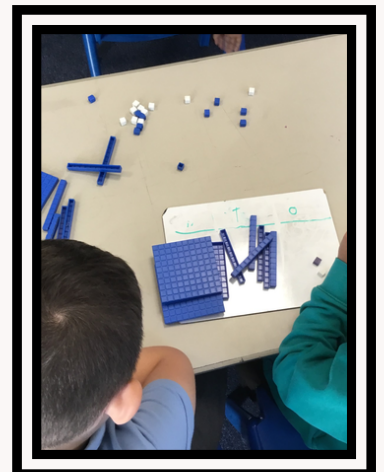

From leaves and twigs to stones and petals, the children explored how nature can be used as a canvas 🎨✨ — and the results were amazing!

Well done, Year 2 – true natural artists! 🌟🍁🏡

Year 3

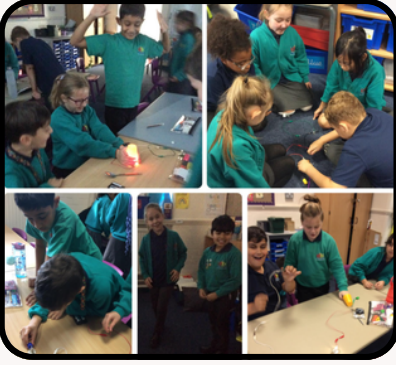

Year 3 mathematicians have been working hard this week making 3-digit numbers and then finding 1, 10 and 100 more or less. They started with concrete resources and are now drawing pictorial representations in their books.

Our scientists have studied soil this week and have used magnifying glasses to discover what soil is actually formed from. Ask us to explain using the vocabulary broken and decomposed. We were shocked to discover what is actually helping us to grow our food.

Let's see what our children have been getting up to...

Year 4

Our year 4 scientists have been very busy investigating which materials are insulators and conductors. They discovered that when they put certain metals into a circuit, the bulb lights up! We have really enjoyed learning about electricity this half term. In maths, year 4 have progressed really well and are now doing decimal numbers with tenths and hundredths! Ask your child about what an integer and a decimal number is!

Year 5

Year 5 have loved exploring their poem for National Poetry Day last week. Our theme was play and the children loved 'playing' with words. They felt so inspired by the poetry that they wrote their own! The children performed their poems in assembly for the rest of school. We were so impressed with their expression and pace when they delivered their lines - they had us in stitches! Here are some of our favourite bits:

Flynn - "Is a dinosaur, a T-rex with a chainsaw?!"

Malika - "Does someone actually hope you break your leg when they wish you good luck for a show?"

Daisy - "Is a timetable, a table that can tell the time?"

Arthur - "Is a strawberry, a berry made out of straws?"

Tegan - "Is a sister-in-law, my sister who has just broken the law?"

Jensen - "Are baby wipes, wipes made out of babies?!"

Year 6

Our Year 6 scientists have been investigating how to keep our hearts strong and healthy! As part of their science learning, they explored the importance of a balanced diet, regular exercise, and plenty of sleep in maintaining a healthy heart.

To share what they discovered, pupils created TikTok-style presentations to showcase their findings in a fun and engaging way for the class. They also performed a beautiful poem about the heart, which they proudly shared with parents during our Wednesday "Reading Together" session.

It's been an inspiring week of learning, creativity, and collaboration — well done, Year 6! ❤️

Learning Garden 1

🐷🌟 This Week in The Learning Garden 🌟🐷

Our little learners have been busy huffing, puffing, and building their own adventures as we explored The Three Little Pigs! 🐷🐷🐷

From storytelling and puppet play to hands-on STEM fun with straw, sticks, and "bricks," the children dove into this classic tale with curiosity and creativity. 🏠🌿

We saw big bad wolves in dramatic play, tiny architects testing their house designs, and lots of laughter along the way. 🐺🏠❤️

Ask your child which pig they liked best — and what they'd build their house out of! 🏠🌟

In RE this week LG2 have been learning about how Christians follow and trust in God. We have learnt about how Noah followed the word of God when he built the ark and the covenant that God made to Noah and humanity for trusting in him.

RLA Attendance

Congratulations to 5AH who have achieved the best class attendance this week at 97.2% - you are all superstars! Congratulations also to our attendance prize winners in assembly!

Remember, in addition to the weekly prize draw, we are also continuing with badges. All children who achieve over 95% attendance this half term will be awarded a badge which should be worn with pride. For children who have already been absent this half term, there is still time to improve overall attendance all you have to do is arrive to school on time every day!!

Every moment matters - attendance counts!!!

World Mental Health Day

STARS OF THE WEEK

RCR: Dennis

RLM: Ralphy

1MK: Bryan

1RW/LD: Emmanuel

2BP: Zoe

2JC: Ariya D

3TC: Sara C

3NP: Scarlett

4JK: Matei C

4EG: Sara

5AH: Jensen

5FS: Angel

6AC: Sara N

6SH: Sophia M

LG 1: George E

WELL DONE SUPERSTARS!
