

## Vocabulary Progression for Computing 2023-24

Vocabulary Progression	Term	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Vocabulary (Tier 1)	1	Save, take	Predict, investigate, decide, evaluate	Recognise, use, online communication, wifi	Save, document retrieval, make, input, device	Complex systems, comparison, testing, sequencing	World wide web, selected and ranked, communication and collaboration, limitations, data
	2	Recognise, understand, use	Save, retrieve, input, experience, test	Predict, investigate, decide, evaluate, order	Know, use	Shortcuts, create, modifications	Physical systems, reasoning, selection, variables
	3	Guess, make	Connect/join	Retrieve, recollect, plan	Plan, investigate, decide, evaluate, identify, improve	Collaboration, communication, search engines, trustworthy, data	Atmosphere, digital, audience,
	4	Save, take	Predict, investigate, decide, evaluate	Recognise, use, online communication, wifi	Save, document retrieval, make, input	Complex systems, comparison, testing, sequencing	World wide web, selected and ranked, communication and collaboration, limitations
	5	Recognise, understand, use	Save, retrieve, input, experience, test	Predict, investigate, decide, evaluate, order	Know, use	Shortcuts, create, modifications	Physical systems, reasoning, selection, variables
	6	Guess, make	Connect/join	Retrieve, recollect	Plan, investigate, decide, evaluate, identify, improve	Collaboration, communication, search engines	Atmosphere, digital, audience,

## Vocabulary Progression for Computing 2023-24

<b>Vocabulary (Tier 2)</b>	1	Manage, input, retrieve	Command, navigation, device, plan	Email, SMS, instant messenger, server, filtering	Create, interpret, present, display	Physical systems, decompose, physical systems, simulations, variables	Search operators, services
	2	Search engine, website	Keys, input, symbols, characters, device, files	Sequencing	Recognise, sever, switch, router, client, blog	Amendments and change, functions,	Simulating, simulation, controlled environments, decomposition
	3	Predict, create, improve	Networks, search engines	Document retrieval	Repetition, inputs and outputs	Ranking	Effectiveness, unreliable, illegitimate
	4	Manage, input, retrieve	Command, navigation, device	Recognise, use, online communication, wifi	Create, interpret, present, display	Physical systems, decompose, physical systems, simulations	Search operators, services
	5	Search engine, website	Keys, input, symbols, characters, device, files	Predict, investigate, decide, evaluate, order	Recognise, sever, switch, router, client, blog	Amendments and change, functions,	Simulating, simulation, controlled environments, decomposition
	6	Predict, create, improve	Networks, search engines	Retrieve, recollect	Repetition, inputs and outputs	Ranking	Effectiveness, unreliable, illegitimate
<b>Vocabulary (Tier 3)</b>	1	Evaluate, assess	Debug, logical	Operators, search operators	accomplishments	Syntax, logic and code	Boolean operator
	2	Browser	Software, hardware	Decomposing	Acknowledge, collaboration	Multimedia	Supported reasoning

### Vocabulary Progression for Computing 2023-24

	3	Investigate, decide, evaluate	Storage and memory, documents	Modification and navigation	Systematically, purposefully	Efficient engines, reliability, audience	Constructive, functional
	4	Evaluate, assess	Debug, logical	Recognise, use, online communication, wifi	Accomplishments, flow diagram, storyboard	Syntax, logic and code	Boolean operator
	5	Browser	Software, hardware	Predict, investigate, decide, evaluate, order	Acknowledge, collaboration	Multimedia	Supported reasoning
	6	Investigate, decide, evaluate	Storage and memory, documents	Retrieve, recollect	Systematically, purposefully	Efficient engines, reliability, audience	Constructive, functional
