

All Creatures Great and Small

Key Facts

- Oceans contain up to 226,000 different species of underwater animals.
- The African Bush Elephant is the largest land animal.
- The Etruscan Shrew is the smallest land animal.
- Zooplankton are the smallest animals in the ocean.
- Blue whales are the largest animal in the ocean (they're also considered the largest animal ever known to have lived on Earth.)

Key Vocabulary

Continent	A large solid area of land.
Ocean	A huge body of salt water. Oceans cover nearly 71% of Earth's surface.
Creature/Animal	A living thing. We will be looking at creatures and animals that live on land and in water.
Habitat	A place where an animal lives. It provides the animal with food, water, air and shelter.
Native	A place where an animal lives or grows naturally.
