

Colour Week

This week we would like to have a whole school approach to home learning, we often have arts/science week and other exciting cross-curricular activities where we all join in together. This week all your teachers have put together, some exciting colour activities that we would love you to participate in!

We would like to create a rainbow of colour outside school. Each year group will be given a certain colour and section of the railing to add their masterpieces to! These can be photographs, paintings, material anything you can think of! We know how creative you are!

If people are unable to attach a picture/art/material then please take a photograph and email it to NH@roose.cumbria.sch.uk and Mrs Hazzard will print it off and attach it for you.

Red – Reception

Orange – Year Six

Yellow – Year Two

Green – Year One

Blue – Year Four

Indigo – Year Five

Violet – Year Three

Please maintain social distancing at all times.

The next page has some suggestions that you could choose or maybe you have many ideas of your own! Please click on the links to see the activities in more detail.

You have two weeks to enjoy experimenting with the colour activities and crafts, as the following week is half term and we will not be sending any additional work for half term week. We cannot wait to see all your ideas. Do not forget you can share all your activities with your teachers via email on private groups, Flipgrid or upload onto Purple Mash. We love to see what you have been doing!

Home Learning Activities
Week beginning 18/05/2020

Colour changing milk - Step by step instructions can be found using this [link](#).
