

## Task A

Write the questions in the branching database:

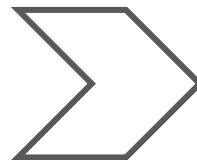

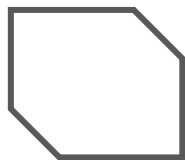

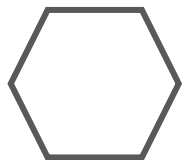

## Task B

Fill in the red question boxes so the shapes are correctly sorted:

## Extend

Design a branching database question to sort these shapes:

**See if someone else can guess what your questions are!**

### Example Answers:

**Task A:** Top question: Does the shape have at least one right-angle? Left question: does the shape have two acute angles? Right question: Does the shape have three acute angles?

**Task B:** Top question: Does the shape have two pairs of adjacent lines the same length? Left question: Does the shape have a reflex angle? Right question: does the shape have two pairs of parallel lines?
