

Our Curriculum and Enrichment provision for students who are identified as working at Greater Depth

RYE ADVANCE

The Rye Advance Programme is designed to ensure that those students who are identified as working at Greater Depth, either from Primary School, through their SATS, or through our own internal testing, have their learning needs met to make sure that they continue to advance throughout their time at Secondary School.

We have a Rye Advance class in each year and the Curriculum and teaching methods for these classes are adapted to ensure that there is depth, breadth, stretch and challenge for these students. The Rye Advance programme considers students working at Greater Depth in the practical subjects, such as PE, technology and the visual and performing arts as just as important as those working at this level in the classroom-based subjects.

Rye Advance students will follow the same curriculum as their peers.

However, students will progress more quickly through parts of the curriculum, allowing for greater breadth and depth of study. Students will receive homework that is adapted to support their learning and academic development.

The Rye Advance programme also seeks to provide enrichment opportunities for all students in the areas that their student voice activities have identified. The Rye Advance Team will be running extra-curricular clubs during lunch time each week that will focus on anything from chess, to anime, to a student-led choir, to a Dungeons and Dragons club.

TEAM

The Rye Advance Student Team meet once a week to discuss Rye Advance activities, capture student voice and run extra-curricular clubs for their fellow students.

COLLABORATION WITH PRIMARY SCHOOL PARTNERS

An important dimension to Rye Advance is our engagement with our Primary school partners. Year 5 workshops will run throughout the academic year, inviting Year 5 pupils to participate and explore in the breadth and depth of different subject areas within a Secondary School setting.

COMMUNITY

Our local community plays a fundamental part of our programme. We work alongside many local businesses and organisations to provide Advance opportunities. We also actively promote our students' success within the wider community.
