

# Reasoning and Problem Solving

## Step 9: Estimate Answers

### National Curriculum Objectives:

Mathematics Year 4: (4C2) [Add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate](#)

Mathematics Year 4: (4C3) [Estimate and use inverse operations to check answers to a calculation](#)

### Differentiation:

Questions 1, 4 and 7 (Reasoning)

**Developing** Identify which calculation is the odd one out by rounding to the nearest 10 or 100. Numbers up to 1,000. Place value counters as pictorial support.

**Expected** Identify which calculation is the odd one out by rounding to the nearest 10, 100 or 1,000. Numbers up to 10,000.

**Greater Depth** Identify which calculation is the odd one out by rounding to the nearest 10, 100 or 1,000. Numbers up to 10,000 and written in words.

Questions 2, 5 and 8 (Reasoning)

**Developing** Compare estimates and explain which is the most sensible. Includes numbers up to 1,000. Place value counters as pictorial support.

**Expected** Compare estimates and explain which is the most sensible. Includes numbers up to 10,000. Using numerals only.

**Greater Depth** Compare estimates and explain which is the most sensible. Includes numbers up to 10,000. Using a mixture of numerals and words with some unconventional partitioning.

Questions 3, 6 and 9 (Problem Solving)

**Developing** Identify the missing number in a calculation by rounding to the nearest 10. Numbers to 1,000. Place value counters as pictorial support.

**Expected** Identify the missing number in a calculation by rounding to the nearest 10 and nearest 100. Numbers to 10,000.

**Greater Depth** Identify the missing number in a calculation by rounding to the nearest 100 and 1,000. Numbers to 10,000. Using a mixture of numerals and words with some unconventional partitioning.

## Estimate Answers

1a. Which calculation is the odd one out?

A. 

H	T	O
4 blue	2 yellow	1 green
+		
1 blue	3 yellow	2 green

B. 

H	T	O
4 blue	2 yellow	2 green
+		
1 blue	3 yellow	2 green

C. 

H	T	O
4 blue	1 yellow	6 green
+		
1 blue	3 yellow	6 green

Explain how you know.

R

## Estimate Answers

1b. Which calculation is the odd one out?

A. 

H	T	O
4 blue	2 yellow	3 green
+		
1 blue	2 yellow	6 green

B. 

H	T	O
4 blue	2 yellow	6 green
+		
1 blue	2 yellow	3 green

C. 

H	T	O
4 blue	2 yellow	6 green
+		
1 blue	3 yellow	3 green

Explain how you know.

R

2a. Evie and Dominic are estimating the answer to  $308 + 188$

It's about 500

Evie

It's about 400

Dominic

Who makes the most sensible estimate?  
Explain your choice.

R

2b. Max and Heena are estimating the answer to  $253 + 346$

It's about 500

Max

It's about 600

Heena

Who makes the most sensible estimate?  
Explain your choice.

R

3a. The total number of residents in two blocks of flats is 939. Georgia is calculating the amount of residents in Block B.

Block A has 823 residents

Estimate the number of residents in Block B by rounding to the nearest 10

PS

3b. The total number of people in two hotels is 786. Tommy is calculating the amount of people in Hotel B.

Hotel A has 452 residents

Estimate the missing number of people in Hotel B by rounding to the nearest 10

PS

## Estimate Answers

4a. Which calculation is the odd one out.

A.

$$4,293 + 3,526$$

B.

$$2,814 + 5,005$$

C.

$$6,325 + 1,496$$

Explain how you know.

R

## Estimate Answers

4b. Which calculation is the odd one out.

A.

$$6,893 - 3,539$$

B.

$$4,189 - 824$$

C.

$$8,625 - 5,275$$

Explain how you know.

R

5a. Theo and Jenny are estimating the answer to  $3,678 + 1,982$

Theo

It's about  
4,000

Jenny

It's about  
5,700

Who makes the most sensible estimate?  
Explain your choice.

R

5b. Beth and Adam are estimating the answer to  $9,354 - 5,877$

Beth

It's about  
4,000

Adam

It's about  
3,500

Who makes the most sensible estimate?  
Explain your choice.

R

6a. The total workers in two offices is 9,283. Molly is calculating the amount of workers in Office B.

Office A has 6,139  
workers.

Estimate the number of workers in Office B  
by rounding to the nearest 10 and the  
nearest 100

PS

6b. The total of patients in a hospital is 8,191. Ted is calculating the amount of patients in Hospital B.

Hospital A has 4,973  
workers.

Estimate the numbers of patients in  
Hospital B by rounding to the nearest 10  
and the nearest 100

PS

## Estimate Answers

7a. Which calculation is the odd one out.

- A. six thousand, eight hundred and seventy-one add one thousand, five hundred and ninety-three
- B. six thousand, three hundred and twenty-nine add two thousand, one hundred and thirty-three
- C. four thousand, nine hundred and forty-two add three-thousand five hundred and twenty-six

Explain how you know.

R

## Estimate Answers

7b. Which calculation is the odd one out.

- A. one thousand, eight hundred and seventy-five add four thousand, six hundred and forty-seven
- B. three thousand, two hundred and twelve add three thousand, three hundred and nineteen
- C. four thousand, four hundred and forty-four add two thousand one hundred and ninety-five

Explain how you know.

R

8a. Charlie and Freya are estimating the answer to five thousand, eight hundred add one thousand, two hundred and thirty-four

Charlie

It's similar to  
 $6,000 + 1,000$

Freya

It's similar to  
 $5,000 + 1,200$

Who makes the most sensible estimate?  
Explain your choice.

R

8b. James and Morgan are estimating the answer to four thousand, eight hundred and nine add three thousand, two hundred and seventy-six

James

It's similar to  
 $5,000 + 3,000$

Morgan

It's similar to  
 $6,000 + 3,400$

Who makes the most sensible estimate?  
Explain your choice.

R

9a. The total workers in two factories is nine thousand, two hundred and seventy-five. Paul is calculating the amount of workers in Factory B.

### Workers in Factory A

4,000 operators  
1,800 mechanics  
110 managers  
9 directors

Estimate the number of workers in Factory B by rounding to the nearest 100 and the nearest 1,000

PS

9b. The total workers in two power plants is six thousand, one hundred and ninety-three. Sam is calculating the amount of workers in Power Plant B.

### Workers in Power Plant A

2,000 technicians  
1,700 engineers  
150 inspectors  
3 managers

Estimate the number of workers in Power Plant B by rounding to the nearest 100 and the nearest 1,000

PS

## Reasoning and Problem Solving Estimate Answers

### Developing

1a. Various answers, for example: B is the odd one out when rounded to the nearest 10 as it totals 980, A and C total 880; B is also the odd one out when rounded to the nearest 100 as it totals 1,000, A and C total 900.

2a. Evie because  $308 + 188$  when rounded to the nearest 10 is  $310 + 190 = 500$  and when round to the nearest 100 is  $300 + 200 = 500$

3a. 120

### Expected

4a. Various answers, for example: C is the odd one out when rounded to the nearest 1,000 as it totals 7,000, A and B total 8,000; C is also the odd one out when rounded to the nearest 10 as it totals 7,830, A and B total 7,820

5a. Jenny because  $3,678 + 1,982$  when rounded to the nearest 100 is  $3,700 + 2,000 = 5,700$

6a. 3,140 (rounded to the nearest 10);  
3,200 (when rounded to the nearest 100)

### Greater Depth

7a. Various answers, for example: B is the odd one out when rounded to the nearest 1,000 as it totals 8,000, A and C total 9,000; A is the odd one out when rounded to the nearest 100 as it totals 8,500, B and C total 8,400; C is the odd one out when rounded to the nearest 10 as it totals 8,470, A and B total 8,460.

8a. Charlie because  $5,800 + 1,234$  when rounded to the nearest 1,000 is  $6,000 + 1,000 = 7,000$

9a. 3,000 (nearest 1,000); 3,400 (nearest 100)

## Reasoning and Problem Solving Estimate Answers

### Developing

1b. C is the odd one out when rounded to the nearest 10 as it totals 660, A and C total 650.

2b. Heena because  $253 + 346$  when rounded to the nearest 10 is  $250 + 350 = 600$  and when rounded to the nearest 100 is  $300 + 300 = 600$

3b. 340

### Expected

4b. Various answers, for example: C is the odd one out when rounded to the nearest 1,000 as it totals 4,000, A and B total 3,000; C is also the odd one out when rounded to the nearest 100 as it totals 3,300, A and B total 3,400; B is the odd one out when rounded to the nearest 10 as it totals 3,370, A and B total 3,350.

5b. Adam because  $9,354 - 5,877$  when rounded to the nearest 100 is  $9,400 - 5,900 = 3,500$

6b. 3,220 (when rounded to the nearest 10); 3,200 (when rounded to the nearest 100)

### Greater Depth

7b. Various answers, for example: A is the odd one out when rounded to the nearest 1,000 as it totals 7,000, B and C total 6,000; C is the odd one out when rounded to the nearest 100 as it totals 6,600, A and B total 6,500; C is also the odd one out when rounded to the nearest 10 as it totals 6,640, A and B total 6,530.

8b. James because  $4,809 + 3,276$  when rounded to the nearest 1,000 is  $5,000 + 3,000 = 8,000$

9b. 2,000 (nearest 1,000); 2,300 (nearest 100)
