

[Click here](#) to take a quick quiz about Antarctica. Challenge your family to beat your score!

Once you have completed the quiz, you are going to create a similar map to last week, but this time with animals!

Using the map on the timetable, you can either draw, trace or print out the blank map.

You are then going to draw animals on the map where you would find them in Antarctica. You could copy and paste pictures onto the map or print pictures out.

For example, you will find penguins near the coastline, so you draw a penguin there. You will find killer whales in the ocean so you draw them there.

I would like you to find at least 10 animals that live in Antarctica using the internet and draw them onto your map. Here is a link to help you find the animals.
