

# Another busy and exciting week at Sacred Heart School where remote and in-school learning is fun!

## Reception

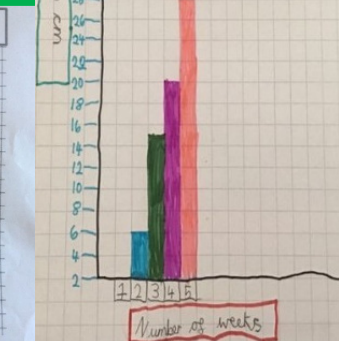

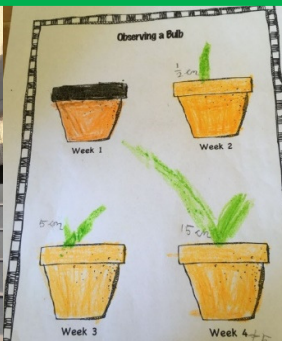

We have returned to school in our own special bubble, so the theme this week in Reception has been Bubbles. We have been learning that if we have fun and play in our bubble then we can stay safe together. In Maths we have been adding bubble bonds to 10 and for our writing we had some inspiration from the book 'Bubble Trouble'. We have been lucky to spend time learning and exploring outdoors and we went on a hunt to find nature objects in nature to match our colours.

## Year 2

The children in Year 2 have been SUPER SCIENTISTS! They each planted a Sunflower and a Gladioli to compare the growth of a seed and a bulb. They kept a diary over 5 weeks, comparing the two plants and observing, measuring and recording the growth. They then used their measurements to create a bar graph. As the 4<sup>th</sup> week of growth coincided with the half term break, the children were able to extrapolate the information from their bar graphs to estimate how tall their plant was in week 4!

## Year 4

Over at Y4 Home Learning HQ, we have been busy again this week. Mrs Blake told us in Liturgy that we have a special job to do by staying at home to learn for a bit longer and we are certainly doing our bit!

We held a Virtual Deforestation Debate about Rainforests and discovered that it's quite a tricky problem to resolve.

Our brain activities continue to stimulate us: we have 'Epic Word of the Day' – 'engrossed' was one of our words this week: *"I was engrossed with my Zoom meeting today, I really enjoyed it, seeing my friends and my teacher Mrs Griffiths!"* (Lily)

*One day, a little lion cub was thirsty, so he went to find a river full of water. He had to travel all the way, across the savannah, so he walked and walked. He got there eventually and was so engrossed by the water that when he finished having a drink, he forgot his way home.* (Felix MC)

In Science we have been looking at the classification of vertebrates. We chose to research one of the five vertebrate groups and looked at rattlesnakes, pandas, barn owls, wolves and goldfinches!

### Name

- ▶ The name panda comes from a Nepalese word "māgalya panya" which means eater of bamboo.
- ▶ There is two types of panda - the Giant Panda and the Red Panda!
- ▶ The Giant pandas can reach 4 to 6 feet in length and 150 to 300 pounds of weight, while red panda can reach 20 to 25 inches in length and 7 to 13 pounds of weight.

### Rattlesnake

Crotalus viridis

A great start back this week Y4 – let's keep going!

## Year 6

*Well, we have all had a super week of learning and fun in Year 6! I don't know who is happier to be back: the children or their teacher!*

*Everyone is having a great time with their project work: Theme Park and Anywhere Island. The children have designed their own theme park, calculating the running costs and preparing promotional leaflets. They have also discovered new islands and designed flags as well as writing the lyrics for a new national anthem.*
