

The digestive process – instructions.(updated)

This new work looks at the digestive process. There is a PowerPoint presentation for you to read through and then there are three worksheets and a quiz. Do the worksheets in any order but do the quiz last. The instructions of how to complete each sheet is written on the sheet. Open the worksheet, have a go at the task and then save the completed worksheet.

Watch the YouTube videos before you do the quiz as they contain lots of the answers. The link for each of the videos is below.

You can print off the sheets if you want.

This work is roughly two lessons long.

Stay safe

Mrs Matthews
