

**Title: The United Nations (UN)**

Objective: To explore what the UN is and its purpose.  
To research the UN's 17 SDG's.  
To explain the difficulties facing the organisation in the next ten years to 2030.  
Teach others about the UN SDGs and think of ways we can achieve them.

**Task: Read this.****The United Nations:**

The United Nations (UN) was founded in 1945 to maintain international peace and security after World War II. The League of Nations was created for the same reasons in 1918, at the end of World War I. The League of Nations came to an end after failing to stop World War II, the most destructive war in history. A new organisation was needed. The UN has 193 Member States, including the United States and Great Britain. The UN works to prevent conflict, helping warring countries make and keep peace. The UN also tries to improve people's money, social, and cultural lives. That means delivering food and shelter to people living through natural disasters, such as earthquakes, as well as human-made disasters, such as war.

### **The Declaration of Human Rights:**

Protecting human rights is an important focus for the United Nations (UN). In 1948 the member states signed the Universal Declaration of Human Rights, which is made up of thirty articles, each of which is a statement included in international law. Article 3 says that everyone has the right to life, liberty and security of person. This means that no one should be killed, hurt, or held against their will. Article 4 outlaws slavery. Other articles protect people's right to have a family life. In 1989, the UN also declared the rights of children in particular. These rights include going to school, meeting other children, and even the right to relax!
