

## Daily Challenge Task

Title: The Ocean

Objective: to understand how pollution effects the ocean around us.

Activity: *(include associated resource, links to online sources, video clips etc)*

- Watch you tube clip of David Attenborough's Blue Planet – plastic pollution <https://www.youtube.com/watch?v=xLx4fVsYdTI>. Make notes whilst watching the video and then discuss the effects of plastic pollution with an adult or someone at home.

Choose one of the below activities:

### Activity 1

Design a sea creature - can be a fish, mammal or amphibian. Think about their habitat, diet, how it moves, what it does? You need to draw the creature and write sentences around the outside. Make sure your creature is colourful!

### Activity 2

Create a power point presentation using the notes you collected whilst watching the Blue Planet clip. Think about the audience, this can be teachers at school or your friends and family. Who would be watching your presentation? What is important and what message are you wanting to portray?

### Activity 3

Make a cereal box aquarium as per the photograph below. Instructions are provided here - <https://www.thebestideasforkids.com/cereal-box-aquarium/> Video also available on this website.

Questions:

- What is the most common cause of plastic pollution?
- What can we do to protect our ocean?
- How can you get your message across to the rest of the school?
