## up to $12 \times 12$

By the end of this term, children should know the following facts. The aim is for ALL children to be able to recall these facts instantly.

## Key Vocabulary:

Please see separate sheet for all times table facts.
This is a chance for Year 6 children to consolidate their knowledge of multiplication and division facts and to increase their speed of recall.

What is 12 multiplied by 6 ?
What is 7 times 8 ? What is 84 divided by 7 ?

They should be able to answer these questions in any order, including missing number questions
e.g. $7 \times \bigcirc=28$ or $\bigcirc \div 6=7$.

Children who have already mastered their times tables should apply this knowledge to answer questions including decimals
e.g. $0.7 \times \bigcirc=4.2$ or $\bigcirc \div 60=0.7$

## Top Tips

The secret to success is practising little and often. Use time wisely. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact family of the day. If you would like more ideas, please speak to your child's teacher.
Speed Challenge - Take two packs of playing cards and remove the kings. Turn over two cards and ask your child to multiply the numbers together (Ace =1, Jack = 11, Queen = 12). How many questions can they answer correctly in 2 minutes? Practise regularly and see if they can beat their high score.
Online games - There are many games online which can help children practise their multiplication and division facts. www.conkermaths.org is a good place to start.
Use memory tricks - For those hard-to-remember facts, www.multiplication.com has some strange picture stories to help children remember.
