Child privacy & online safety summary

CHILDREN CAN

Children can play and download free games, music, videos, and apps, and make game clips of their best moments.

Children can see other people's profiles, and content they create, but need a parent to add friends. A child's friends can communicate with them, and see when they're online and available to play.

OTHERS CAN

Microsoft can use the child's video app history to help improve their experiences. Microsoft will store the child's exercise info with their online profiles and keep it private.

There will be a number of default privacy settings you can choose from. Select one and either keep the default settings or customise them to suit your needs.
