Times table grid challenge

Here is a completed and a blank version of a Year 3 times table challenge grid. You could time your children to see how long it takes them to complete the grid. Can they beat their previous time? Can they beat you? Can they do it just as quickly when the numbers are not in order, as in the second blank example? (This is a good way to check whether children know their times tables off by heart rather than just working them out by counting up from the starting number)
