Sholing Junior School Year 6 Summer 1 Curriculum Newsletter

Overview (topic, trips, focuses for this half-term)

Our focus this half term will be ensuring that the children feel secure in our core subject areas of SPAG, Writing, Maths and Reading. We will continue to practise our reading fluency. We are excited about the upcoming SATs and are eager to give our best effort as the children have worked so hard.

English

We will be continuing with our book study of Wild Boy with a focus on writing a balance argument. We will also be revising for the children's SPAG SATs.

Maths

We will be revising all of the learning that the children have completed this year ready for the SATs tests in the middle of May. Please see the important dates and websites for extra support

Science

During the summer term, we will explore how light travels in straight lines, explaining that objects are visible because they either emit or reflect light into our eyes. We will also discuss how light travels from sources to objects and then to our eyes, and why shadows mirror the shape of the objects that cast them.

PSHE

In PSHE we will be exploring how to keep safe within our relationships and respecting ourselves.

PE

We will continue to develop our key skills we have learnt this year to work as a team to complete challenges.
