# **Sholing Junior School's Mathematics Calculation Policy:** Mental and Written Calculations for the **New Curriculum 2014**

This policy outlines both the mental and written methods that should be taught from Year 1 to Year 6.

The policy has been written according to the National Curriculum 2014 and the written calculations for all four operations are as outlined on the appendices of the Programme of Study.

The document builds on the interconnectedness of mathematics and outlines the progression for addition, subtraction, multiplication and division. It is our intention that addition and subtraction should be taught at the same time to ensure children are able to see the clear links between the operations and the inverse nature of them along with multiplication and division.

Children should secure mental strategies. They are taught the strategy of counting forwards and backwards in ones and tens first and then 'Special Strategies' are introduced. Children are taught to look carefully at the calculation and decide which strategy they should use. Children should explain and reason as to why they have chosen a strategy and whether it is the most efficient.

The formal written methods should be introduced with caution. Calculations that require a written method should be presented to the children and models and images, such as dienes apparatus, place value counters, etc. should be used to ensure children have a conceptual understanding of the written method and that it is not a process that the children use for every type of calculation regardless of whether it can be completed mentally or mentally with jotting i.e. the number line.

The policy outlines the **mental strategies** that children should be encouraged to use:

A mental strategy that they can always rely on E.g. counting in tens and units, forwards and backwards E.g. 56 – 25 (count back in 10s 56, 46, 36 and back in units 36, 35, 34, 33, 32, 31)

A special strategy they can select from a small range of strategies if they can see something special about the numbers they are being asked to calculate with E.g. 46 – 24 (I can use near doubles to support my calculation E.g. 46 – 23 – 1)

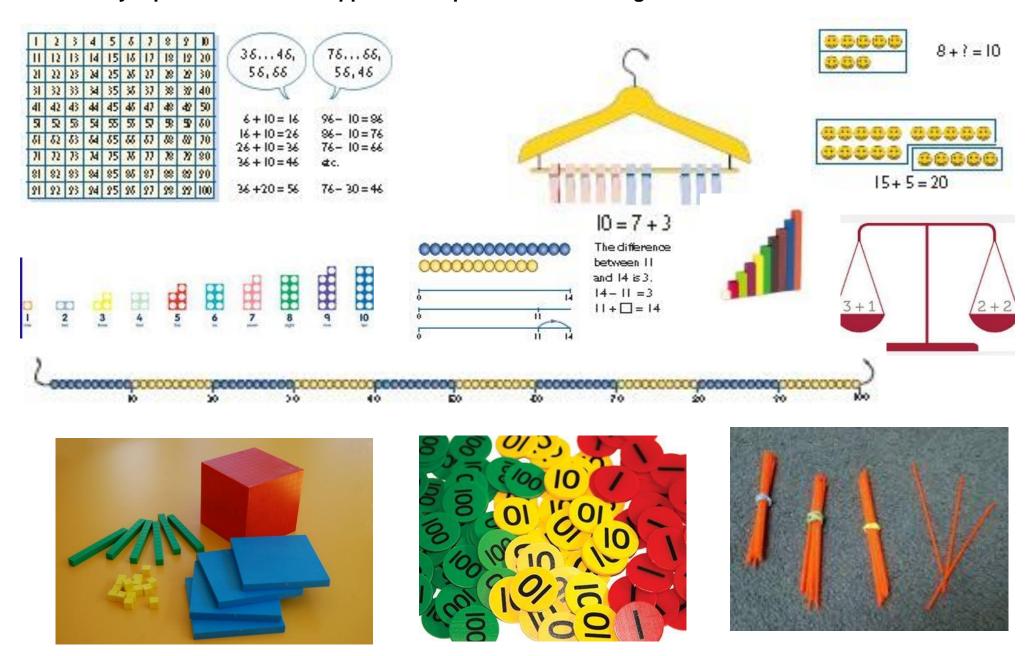

The policy outlines the **written methods** as suggested on the appendices of the Curriculum 2014 and suggests that children:

- Look at a calculation and decide whether it can be done mentally, mentally with a jotting or whether it needs a written method.
- Should always be shown written methods with place value apparatus to ensure children are clear about the value of the numbers that they are calculating with and the numbers do not just become digits.
- Estimate, calculate and check to ensure that the answer they generate has some meaning.

For the purpose of developing understanding there may be occasions when examples that can be completed mentally may be shown as a written method purely to develop understanding of the method. This needs to be made very clear to children and when they are practising the methods, appropriate calculations should be used.

There is also a section on calculating with fractions; the expectations from Y1—Y6 and examples with the models and images that should be used in order to ensure children develop a conceptual understanding when calculating with fractions.

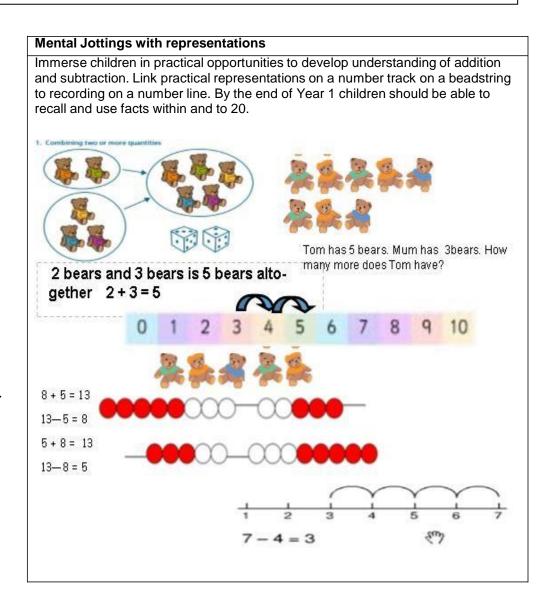

#### Key representations to support conceptual understanding of addition and subtraction.

## **DEVELOPING UNDERSTANDING OF ADDITION AND SUBTRACTION**

Year 1	
Objectives	Recall of Facts
read, write and interpret mathematical statements involving addition (+),	=   +
subtraction (-) and equals (=) signs	If we know 4 + 5 = 9 We also know: , 5 + 4 = 9
represent and use number bonds and related subtraction facts within 20	9 - 5 = 4 9 - 4 = 5 14 + 5 = 19 19 - 14 = 5, etc
add and subtract one-digit and two-digit numbers to 20, including zero	Work with all numbers up to 20.

Children need to be secure with using and applying these skills in unfamiliar contexts before moving into the Year 2 objectives.

Year 2		
Objectives:	Mental Recall/Jottings:	Written Methods with representations
Show that addition of two	Using known facts	Recording addition and subtraction in columns supports
numbers can be done in any	If I know:	place value and prepares for formal written methods.
order and subtraction	2+3 = 5	
cannot.	I also know:	Tens Ones
	3+2 = 5	
	20 + 30 = 50	2 0 + 3
	30 + 20 = 50	
Recall and use addition and	50—30 = 20	10 + 3 0 + 4
subtraction facts to 20 fluently	50—20 = 30	10 = 50 + 7
and derive and use related facts	Bridge through 10	30.7
up to 100.	26 + 7 = 26 + 4 + 3	10 = 57
·	26 + 4 = 30	10
Add and subtract numbers using	30 + 3 = 33	
concrete objects, pictorial	Counting on/back in10s	
presentations and mentally	26 + 20 =	40+7
including:	67-20	
2 digit number and ones	Partitioning	30 + 5
3	23 + 34 =	70+12=8
	46—25	70+12=8.
2 digit number and tens	Special Strategy	
_ a.ga	Rounding and adjusting	
	+ 9—9 +11—11	
Two 2 digit numbers	Bonds to 10	
1 We 2 digit Hambers	2+7+8=8+2+7	
Add three 1 digit numbers	Finding the difference between two numbers. 71 – 37:	****
Add till ce i digit flambers		Tens Ones
Solve problems with addition	71 - 37 = 34	
and subtraction:	63 £30 £D	10 10 10 10
using concrete objects and	37 40 70 71	10 10 10 10

including those involving	subtracting using decomposition:	
numbers, quantities and	90 + 2	10 10 10 10
measures	80 + 12 (I have subtracted a ten and added it onto the ones)	10 10 10
<ul><li>applying their increasing</li></ul>	Continue to record mental jottings as outlined in Year 2 with	
knowledge of mental and	increasingly larger numbers.	Encourage children to recognise this can be completed mentally
written methods	Use suitable resources as required (See models and images page).	$42 \rightarrow 40 + 2 \rightarrow 30 + 12 \rightarrow 42 - 15 = 27$
willen memous	Children that have not achieved the age related expectations for Year	-15 10 + 5 <u>10 + 5</u>
	2 should not move onto formal written methods until they are secure	<u>20 + 7</u>
	with mental recall/jottings.	
	, ,	

# Year 3 Objectives: Add and subtract numbers mentally A 3 digit number and 1s

A 3 digit number and 1s A 3 digit number and 10s A 3 digit number and 100s

Add and subtract numbers with up to 3 digits using formal written methods of columnar addition and subtraction.

#### Mental Recall/Jottings:

#### Bridging to 10

$$425 + 8 = 425 + 5 + 3$$
$$= 430 + 3$$
$$= 433$$

#### **Rounding and Adjusting**

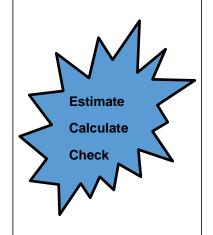

$$425 + 90 = 425 + 100$$
  
= 525 - 10  
= 515

$$146 - 9 = 146 - 10 + 1$$
$$= 136 + 1$$
$$= 137$$

$$146 - 50 = 146 - 40 - 10$$
$$= 106 - 10$$
$$= 96$$

#### Counting forwards or backwards in 100s

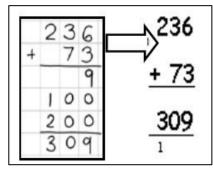

$$636 - 500 = 136$$

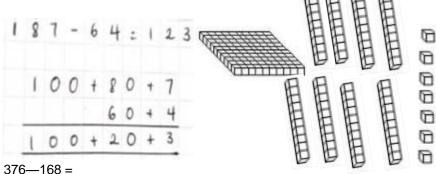

#### Written Methods with representations

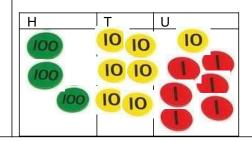

Pupils use their understanding of place value and partitioning, and practise using columnar addition and subtraction with increasingly large numbers up to three digits to become fluent.

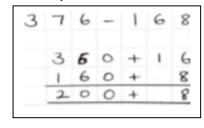

Hundreds	Tens	Units
100	10	)
100	10	9
	10	
		•

Using my knowledge of partitioning in different ways. 376 = 360 + 16.

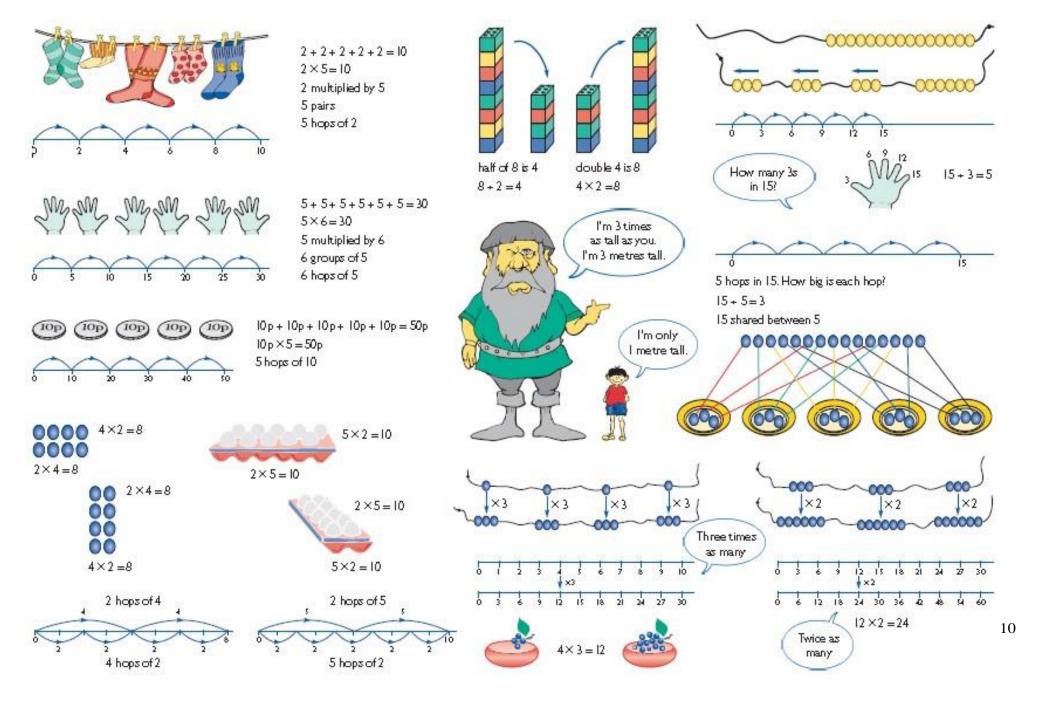

Year 4

operations and methods to use and why.	1997 2000 2001 13486—5000 13486—3000 = 10486 10486—2000 = 8486	25.356 +346.28 371.636	<sup>8</sup> 9. <sup>1</sup> 076 <u>3. 142</u> <u>5. 934</u>	

Year 6		
Objectives:	Mental Recall/Jottings:	Written Methods:
Perform mental calculations, including with mixed operations and large numbers  Use their knowledge of the order of operations to carry	Ensure children use a wide range of mental strategies when calculating including decimals and increasingly larger numbers.  What is 2 minus 0.005?  What is 5.7 added to 8.3?	12 462 + 8456  Estimate: 21 000 = 12 500 + 8 500  12 462 + 8 456 20 918 1 1
out calculations involving the four operations	+3	3906 = 12 462 - 8556
Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why	42 +3 ×2	Estimate: $4000 = 12500 - 8500$ $1^{11}2^{1}4^{5}6^{1}2$ - $8556$ $3906$ Add and subtract numbers with a different number of decimal places.
		12.4 – 3.56 =
	57 + = 125	Estimate: $12 - 4 = 8$ (my answer should be between 8 and 9)
	911 – 47 =	1 <sup>1</sup> 2 <sup>/,13</sup> 4 <sup>1</sup> 0 - 3.56 8.84

## Key representations to support conceptual understanding of multiplication and division

Year 1		
Objective	Examples	Representations
Count, read and write numbers to 100 in numerals; count in multiples of twos, fives and tens	Use of visual models to support counting in 2, 5, 10  Ensure children begin to see the patterns of counting in 2, 5, 10.  Double/halve numbers up	Grouping and sharing  Arrays
Double numbers to 20	to: $10 + 10 = 10 \times 2$ $20 - 10 = 20 \div 2$	How many legs will 3 teddies have?
	Children do not need to record number sentences using the symbols. Develop the vocabulary by encouraging children to explain what they are doing.	2 hops of 4  4 hops of 2  4 hops of 2

Year 2		
Objective	Examples	Models and Images
Count in steps of 2, 3, and 5 from 0, and in tens from any number, forward or backward (copied from Number and Place Value)  Recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers  Show that multiplication of	$2 \times 5 = 10$ $5 \times 2 = 10$ $10 \div 2 = 5$ $10 \div 5 = 2$ Use knowledge of doubling: $2 \times 10 = 20$ $10 \times 2 = 20$	2×4=8  00  2×4=8  00  4×2=8  How marry 3s in 15?  5 hops in 15. How big is each hop?  15 + 5 = 3  15 shared between 5
two numbers can be done in any order (commutative) and division of one number by another cannot  Written: calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication (x), division (÷) and equals (=) signs	$20 \div 2 = 10$ $20 \div 10 = 2$	$3 \times 5 = 15$ $15 \div 5 = 3$

Year 3					
Objective	Mental Recall Examples	Progressing	g from Me	ntal to Writte	en Methods with representations
Count from 0 in multiples of 4, 8, 50 and 100 (copied from Number and Place Value)  Recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables  Write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one- digit numbers, using mental and progressing to formal written methods (appears also in Written Methods)	If the children know 2/5/10 facts they now need to learn:  3 x 3  4 x 4  6 x 8  4 x 3  6 x 4  7 x 8  6 x 3  7 x 4  8 x 8  7 x 3  8 x 4  9 x 8  8 x 3  9 x 4  11 x 8  9 x 3  11 x 4  12 x 8  11 x 3  12 x 4  12 x 3  With corresponding division facts. Recall facts along with counting in steps sizes.  4 x 3 = 3 x 4  12 ÷ 3 = 4  12 ÷ 4 = 3  To make 6 fairy cakes you need	$   \begin{array}{c}                                     $	10 50 X +	5 25 15 5 25 50 75	en Methods with representations  10
	How much will you need for 12?	given short	multiplica	ation and div	vision involving 2/3/4/5/6/10 times tables

Objective	Mental Methods	Written Methods with representations
Count in multiples of 6, 7, 9, 25 and 1 000 (copied from Number and Place Value)  Recall multiplication and division facts for multiplication tables up to 12 x 12  Use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers.  Recognise and use factor pairs and commutativity in mental calculations (appears also in Properties of Numbers)  Multiply two-digit and three-digit number using formal written layout	If the children know multiplication and division facts for: 2/5/10/3/4/8/ they now need to learn.  6 x 6 7 x 7 9 x 9 11 x 11 7 x 6 9 x 7 11 x 9 12 x 11 9 x 6 11 x 7 12 x 9 12 x 12 11 x 6 12 x 7 12 x 6  Explore what happens when we divide by 1 and 0.  To solve 24 x 3 Use knowledge of factor pairs.  8 x 3 x 3 6 x 4 x 3  In measuring and scaling contexts, (for example, four times as high, eight times as long etc.) and correspondence problems in which m objects are connected to n objects (for example, 3 hats and 4 coats, how many different outfits?; 12 sweets shared equally between 4 children; 4 cakes shared equally between 8 children).	These are the methods from the appendix of the National Curriculum. Schools should agree the methods that they are going to use.  Short multiplication  24 × 12 becomes    24 × 12 becomes   24 × 12 becomes   124 × 12 becomes

#### Year 5

#### **Objective**

Count forwards or backwards in steps of powers of 10 for any given number up to

1 000 000

Multiply and divide numbers mentally drawing upon known facts

Multiply and divide whole numbers and those involving decimals by 10, 100 and 1000

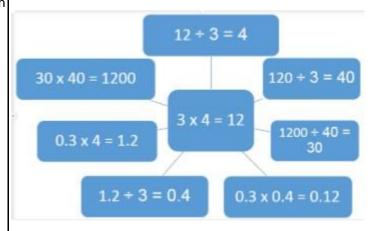

Identify multiples and factors, including finding all factor pairs of a number, and common factors of two numbers.

Know and use the vocabulary of prime numbers, prime factors and composite (nonprime) numbers

Establish whether a number up to 100 is prime and recall prime numbers up to 19

Recognise and use square numbers and cube numbers, and the notation for squared (2) and cubed (3)

#### **Mental Methods**

$$1 \times 1 \circ 1 \times 1 = 1^2$$

$$2 \times 2$$
 00  $2 \times 2 = 2^2$ 

$$3 \times 3 = 3^{2}$$

$$1 \times 1 \times 1 = 1^3$$

$$2 \times 2 \times 2 = 2^3$$

3 x 3 x 3

Multiplying and dividing whole numbers and decimals by 10, 100 and 1000.

Thousands	Hundreds	Tens	Units	/10	/100
				(tenths)	(Hundredths)

Year 5 Continued.		
Objective	Written Methods	
Multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers  Divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context	2307 x 8 = Estimate: 2000 x 8 = 16000 Calculate: (Short multiplication) 2 3 0 7 X	Estimate: $400 \div 5 = 80$ Calculate (short division) $432 \div 5 \text{ becomes}$ $ \begin{array}{c ccccccccccccccccccccccccccccccccccc$

Year 6		
Objective	Mental Methods	
	They undertake mental calculations with increasingly large numbers and more complex calculations.  Pupils continue to use all the multiplication tables to calculate mathematical statements in order to maintain their fluency.  Pupils round answers to a specified degree of accuracy, for example, to the nearest 10, 20, 50 etc., but not to a specified number of significant figures.	
Identify common factors, common multiples and prime numbers	Pupils explore the order of operations using brackets; for example, 2 + 1 x 3 = 5 and (2 + 1) x 3 = 9.  Common factors can be related to finding equivalent fractions.	
Use their knowledge of the order of operations to carry out calculations involving	Calculate 900 ÷ (45 × 4).  A bag of four oranges costs thirty seven pence. How much do twelve oranges cost?	

Year 6 Continued			
Objective	Written Methods		
Multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication	Short division           98 ÷ 7 becomes         432 ÷ 5 becomes         496 ÷ 11 becomes           1 4         8 6 r2         4 5 r1		
Divide numbers up to 4- digits by a two-digit whole number using the formal written method of short division where appropriate for the context divide	7 9 8 5 4 3 2 1 1 4 9 6  Answer: 14 Answer: 86 remainder 2 Answer: 45 1 1 1		
numbers up to 4 digits by a wo-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, ractions, or by rounding, as appropriate for the context	Long division  432 ÷ 15 becomes  2 8 r 12  1 5 4 3 2  3 0 0  1 3 2  1 2 0  1 2 0  1 2 0		
	<u>12</u> = <u>4</u> 5		

	DEVELOPING UNDERSTANDING OF FRACTIONS/DECIMALS AND PERCENTAGES			
Year	Objectives	Examples	Models and Images	
Year 1	Recognise, find and name a half as one of two equal parts of an object, shape or quantity.  Recognise, find and name a quarter as one of four equal parts of an object, shape or quantity	Children use their knowledge of fractions of shape to find fractions of quantities.  Children should be give practical apparatus to find halves and quarters of quantities within 20.		
Year 2	Recognise, find, name and write fractions $^1/_3$ , $^1/_4$ , $^2/_4$ and $^3/_4$ of a length, shape, set of objects or quantity.  Write simple fractions for example, $^1/_2$ of 6 = 3 and recognise the equivalence of $^2/_4$ and $^1/_2$ .	Children use their knowledge of unit and non-unit fractions of shapes to find fractions of quantities. They relate this to find fractions of a length e.g. 2/4 of 1m = Children need to relate finding a quarter to halving and halving again.  Pupils should count in fractions up to 10, starting from any number and using the 1/2 and 2/4 equivalence on the number line (Non Statutory Guidance)	If I can see ½ how many quarters can you see?  If I can see 2/3 how many thirds can you see?  45 46 47 48 49 51 52 53 54 55 56 57 58 9 60 cm  METRE STICK	

Year	Objectives	Examples	Models and Images
Year 3	Count up and down in tenths; recognise that tenths arise from dividing an object into 10 equal parts and in dividing one digit numbers or quantities by 10.  Recognise, find and write fractions of a discrete set of objects: unit fractions and non- unit fractions with small denominators.  Recognise and use fractions as numbers: unit fractions and non- unit fractions with small denominators.  Recognise and show, using diagrams, equivalent fractions with small denominators.	Examples  Encourage children to count up and down in tenths. $1 \div 10 = 1/10$ $2 \div 10 = 2/10$ $3 \div 10 = {}^{3}/{}_{10}$ Continue the pattern. What do you notice? What's the same? What's different?  Children can use fractions as an operator E.g. $1/4$ of $12 = 12 \div 4 = 3$ Children can relate fractions to the division of integers $1 \div 4 = {}^{1}/{}_{4}$ $4 \times {}^{1}/{}_{4} = 1$ $3 \div 4 = {}^{3}/{}_{4}$ ${}^{3}/{}_{4} \times 4 = 3$ ( $12/4$ or ${}^{3}/{}_{4} + {}^{3}/{}_{4} + {}^{3}/{}_{4}$ )  Children need to relate and reason about why their diagrams are equivalent to a half – make connections between the numerator and the denominator E.g. ${}^{1}/{}_{2} = {}^{4}/{}_{8}$ The numerator will be half of the denominator. Children should be encouraged to make the connection between their multiplication tables and equivalents	$\begin{array}{c ccccccccccccccccccccccccccccccccccc$

	Add and subtract fractions with the same denominator within one whole  Compare and order unit fractions, and fractions with the same denominators	E.g. $^{1}/_{3} = ^{3}/_{9}$ because 3 x 3 = 9. $^{-}$ $^{-}$ $^{-}$ $^{-}$ Children need to use practical resources/visual representations to support the comparison of fractions E.g. $^{1}/_{3} > \frac{1}{4}$ Children should also be taught how to order fractions on a number line	1 whole    1 whole   1   1   1   1   1   1   1   1   1
Year 4	Recognise and show using diagrams, families of common equivalent fractions.  Count up and down in hundredths; recognise that hundredths arise when dividing an object by one hundred and dividing tenths by tenths.  Solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including non-unit fractions where the answer is a whole number.  Add and subtract fractions with the same denominator.	$   \begin{array}{r}     1 \div 100 &= 1/100 \\     2 \div 100 &= 2/100   \end{array} $ $   \begin{array}{r}     3/7 \text{ of } 56 &= 24 \\     3/10 \text{ of } 120 &= 36 \\     \frac{1}{4} &= 12 \\     \frac{3}{4} &= \underline{}   \end{array} $ $   \begin{array}{r}     3/10 &+ 4/10 &= 7/10 \\     9/100 &- 7/100 &= 2/100   \end{array} $	The rot of the cale

	Recognise and write decimal equivalents of any number of tenths or hundredths recognise and write decimal equivalents to ½, ½, ¾.  Find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as ones, tenths and hundredths.  Round decimals with one decimal place to the nearest whole number.  Compare numbers with the same number of decimal places up to two decimal places.  Solve simple measure and money problems involving fractions and decimals to two decimal places.	Children can record on a number line equivalents between 1/10 and 0.1 Count on and back in tenths as decimals and relate to counting on/back in 10ths (fractions).  25 ÷ 10 = 2.5 2 ones and 5 tenths  25 ÷ 100 = 0.25 0 ones, 2 tenths and 5 hundredths or 25 hundredths	$\begin{array}{c ccccccccccccccccccccccccccccccccccc$
Year 5	Add and subtract fractions with the same denominator and denominators that are multiples of the same number.  Multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams.	$\frac{3}{4} - \frac{1}{4} = \dots$ $\frac{1}{10} + \frac{2}{5} = \dots$ $\frac{2}{3} \times 2 = \dots$	I eat 1 more piece of this cake. What fraction would be left?

Year 6	Add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions.  Multiply simple pairs of proper fractions, writing the answer in its simplest form.  Divide proper fractions by whole numbers.	$1/4 \times 1/2 = 1/8$ - $1/3 \div 2 = 1/6$ -	1 6 + 1 2 = 3 8 6 6 6 6 6 6 6 6 6 6 6 6 6 6 6 6 6 6
