

## Curriculum Intent

At Southwold School, the Geography Curriculum will be delivered well with clear progression shown throughout the whole school with a rich language focus. It is important that children develop the skills of a geographer by fully immersing them in all areas of the subject.

At Southwold our enquiry based curriculum is underpinned by our school values. It ensures that the teaching of geography will help each child gain coherent knowledge and fascination about their local community. This will allow children the opportunity to explore the inter-relationship between the earth and its people through the study of place landscapes, resources, and the environment.

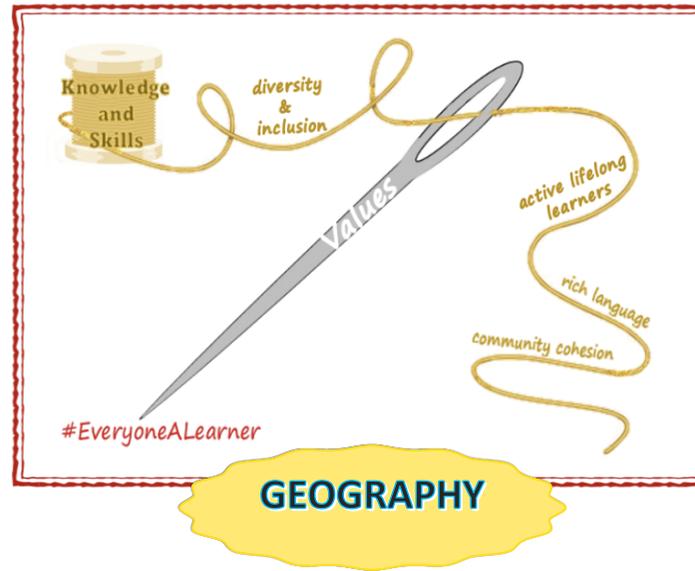

We offer all children the opportunity to participate in all aspects of the humanities curriculum.

Southwold Primary  
& Nursery School

'Be all you can be and together we will shine.'

## Curriculum Implementation

The teaching and implementation of the Geography Curriculum is based on the National Curriculum and linked to topics to ensure a well-structured approach to this subject. Through this we provide diversity and inclusion for every learner.

The children will have opportunities to learn about and explore a range of enquiry questions such as 'Where in the World are we?' which is central to our big question curriculum, inspiring children's curiosity to know more about the world around them.

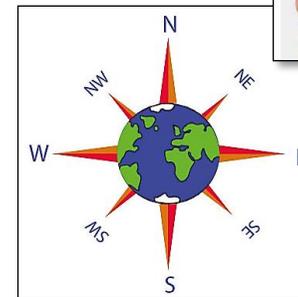

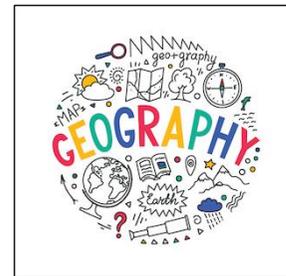

The local area is fully utilised to achieve desired outcomes, with opportunities for learning outside the classroom embedded in practice. School trips and fieldwork are provided to give first hand experiences, which enhance children's understanding of the world beyond their locality.

## Curriculum Impact

By the end of KS2, Southwold children will:

- Have an excellent knowledge of where places are and what they are like.
- Have a progressive learning experience of geographical knowledge and rich vocabulary.
- Be fluent in complex, geographical enquiry and the ability to apply questioning skills and use effective analytical and presentational techniques.
- Be confident using fieldwork and other geographical skills and techniques.
- Have a real sense of curiosity to find out about the world and the people who live there.
- Have the ability to express well-balanced opinions, rooted in very good knowledge and understanding about current and contemporary issues in society and the environment.

As a result of inspiring and engaging Geography lessons with increased opportunities for hands on learning experiences, children have a desire to always want to know and find out more.
